

Scottish Carbon Capture & Storage

<http://www.sccs.org.uk/>

Scottish Carbon Capture & Storage (SCCS) is the largest carbon capture and storage (CCS) research group in the UK, staffed by internationally renowned researchers. SCCS serves as a conduit between academia, industry and government, providing a single point of coordination for all aspects of CCS research ranging from capture engineering and geoscience, to social perceptions and environmental impact, through to law and petroleum economics.

SCCS has access to cutting-edge experimental and analytical facilities, expertise in field studies, modelling and simulation, key academic research personnel to accelerate the development of CO₂ transportation, capture and subsurface storage. The group undertakes strategic fundamental research, as well as providing consultancy services.

Founded in 2005, SCCS is a partnership of the British Geological Survey, Heriot-Watt University, the University of Aberdeen, the University of Edinburgh and the University of Strathclyde, working together with universities across Scotland. SCCS is funded by the Scottish Funding Council.
